

Study in Malaysia

Have you ever thought of studying in Malaysia? If you haven't, I think it's time for you to start thinking about it. Today, I will talk about why studying in Malaysia is a great choice.

First of all, Malaysia is known for its good quality of education. Since Malaysia was under British colonial rule until 1957, it still follows the British education system. So a lot of classes in Malaysia are taught in English.

In addition, universities in Malaysia offer many different study programs. For example, in a program called the double degree program, you can gain two university degrees: one from the U.K. and another from Malaysia. In another program called the twinning program, a student can first study in a Malaysian university for few years and then transfer to another university in a different country to complete the program. Through this program, you can gain valuable experience from two different countries.

Secondly, studying in Malaysia is affordable. For example, you can graduate from a Malaysian university at half the price of tuition fees in the UK. Not only the tuition fees, but the living cost in Malaysia is also affordable. Whether you stay within or outside the campus, you can live comfortably only at half the price of accommodation in Japan. Also, how much do you think it costs to eat lunch in Malaysia? Surprisingly, you can enjoy a great meal with just 300 yen!

Last but not least, Malaysia is famous for its cultural diversity. There are many different ethnic groups in Malaysia such as Malays, Chinese, Indians, and Eurasians. In addition, Malaysia is a destination for many international students. This means that you'll be able to interact with people from all over the world!

Now you know it is great to study in Malaysia. If you want to study in one of the best places in the world, I highly recommend you to study in Malaysia. Now it is time to take off! Thank you.
